

Intersolar Europe, Munich: at the solar energy exhibition, thyssenkrupp Steel presents sustainable materials with high-quality corrosion protection for durable PV mounting systems

- thyssenkrupp Steel represented at Intersolar Europe for the first time
- ZM Ecoprotect® Solar: Effective zinc-magnesium-based corrosion protection solution for the solar energy industry from thyssenkrupp Steel
- June 14 to 16, 2023, Hall A6, booth 614

thyssenkrupp Steel, Germany's biggest steelmaker, will be making its debut at Intersolar Europe this year. The exhibition being held as part of *The Smarter E* in Munich from June 14 to 16, 2023. The experts from Duisburg will be presenting ZM Ecoprotect® Solar: durable, robust and sustainable zinc-magnesium coated steels for high-performance photovoltaic mounting systems.

With ZM Ecoprotect® Solar, thyssenkrupp Steel is presenting an innovative corrosion protection solution for robust steel solar substructures. The high-quality zinc-magnesium coating offers durable corrosion protection for a guaranteed service life of PV mounting systems. The metallic-coated structural steels for solar applications are ideal for processing into profiles and for use in various corrosive atmospheres. With ZM Ecoprotect® Solar, thyssenkrupp Steel is taking a further step in the development of the tried-and-tested ZM Ecoprotect® zinc-magnesium coating, which has already proven itself in the construction industry for decades.

ZM Ecoprotect® Solar also available as bluemint® Steel

In addition, ZM Ecoprotect® Solar is also available as CO₂-reduced bluemint® Steel – thyssenkrupp Steel's sustainable steel that makes a positive contribution to environmental protection and climate change mitigation. The use of bluemint® Steel in PV mounting systems helps to reduce the solar industry's environmental footprint, and create a sustainable future.

Visitors are cordially invited to visit the thyssenkrupp Steel stand at Intersolar Europe in Hall A6, booth 614. The experienced team from thyssenkrupp Steel will be waiting to answer visitors' questions, engage in technical discussions and work together to drive forward the future of solar energy.

"We are delighted to be represented at Intersolar Europe in Munich for the first time, and to present our high-quality zinc-magnesium coated steels for PV mounting systems," says Arne Schreiber, Product Manager Industry at thyssenkrupp Steel. "We know what exacting demands our customers have in terms of service life and workmanship in the construction of solar mounting structures. We offer a corresponding portfolio of grades with high-quality ZM coating – including a 25-year guarantee against rust penetration. Our ZM Ecoprotect® Solar steels not only provide effective corrosion protection, but also help reduce the carbon footprint. We invite all visitors to visit our booth. We are looking forward to dialog with you."

Visit thyssenkrupp Steel at Intersolar Europe, June 14 – 16, 2023 in Munich, Germany to learn more about ZM Ecoprotect® Solar, the sustainable steels for PV mounting systems. For more information, visit the official Intersolar Europe website.
