Add value.
Inspire trust.

The Carbon Footprint of Products (CFP) study report v1.0 dated August 2026, prepared by

thyssenkrupp Steel Europe AG („tkSE“)
Kaiser-Wilhelm-Straße 100
47166 Duisburg, Germany

for the time boundary calendar year 2024

was verified according to DIN EN ISO 14064-3:2020 regarding compliance with the requirements from DIN EN ISO 14067:2019.
Result:

(Partial, cradle-to-gate) Carbon Footprint of
1 kg bluemint® recycled 100 hot rolled steel coil

0.92 kg CO_2e

For which tkSE applies a mass-balance chain of custody system acc. ISO 22095-2, attributing 100% steel scrap in the blast furnace feed (explained in more detail in the following pages).

Level of assurance:	reasonable
Materiality threshold(s):	5 % for the total sum of all reported greenhouse gas emissions

This verification opinion is only valid for the specified scope and in combination with the objectives, explanations and criteria for evaluation as documented in the attached verification report.
