Quenched and tempered special structural steels cut from hot strip with excellent cold forming properties

- Dimensions available: thickness ≤ 10 mm, width ≤ 2000 mm
- Minimum tonnage of 20 to 30 tons, no individual plate production

**Advantages for construction and processing:**

- **Very narrow tolerance**
  (Gesamtdickentoleranz innerhalb eines Bleches: Δd ≤ 0,1mm)

- **Very good flatness** (≤ 3 mm/m)

- **High surface quality**

- **Excellent mechanical properties**
  (minimum yield strengths up to 1100 MPa, minimum hardness values up to 500 HB)
