## Stop card: Look, have courage, say stop!

Have you ever experienced a situation where you were in danger of being hurt?

### Definitely!

That's why you should always say „Stop“ when you notice unsafe actions and conditions. It takes courage, but it makes work safer for everyone!

### How do I address my colleagues?

Politely, objectively but firmly. Ask your colleagues to interrupt their work and describe the unsafe action or unsafe condition.

### What if I am approached?

Be respectful and self-critical. Listen to what the colleague says and think about the situation together. Eliminate the risk of accident and only then continue working. Because outsiders often have a different perspective, which helps to recognise and avoid dangerous situations.

## Last-minute check – is everything safe?

Before you start work, do the last-minute-check. You will recognise possible dangers and protect yourself and your colleagues.

## Last-minute check

### Safety and health

Have you done everything you can to work in a safe and healthy environment?

### Personal protective equipment

Are you wearing all your personal protective equipment?

### Tidiness and cleanliness

Have you ensured that your work area is tidy and clean?

### Work and operating equipment

Are you using all work and operating equipment in accordance with the safety guidelines?

### Protection against fires

Have you taken measures to protect yourself and the equipment from fire?

### Secured parts and systems

Do you ensure that you only work on secured parts and systems?

### Coordination

Is communication within the team clear and have all necessary agreements been made?
