

Customer information about REACH-regulation

Regulation (EU) 1907/2006

Steel
Packaging Steel

25.06.2025
Seite 1/1

According to regulation (EU) 1907/2006 regarding registration, evaluation and authorisation (or restriction) of chemicals (REACH) thyssenkrupp Rasselstein acts as manufacturer as well as Downstream User.

All steel products like blackplate and surface finished packaging steel manufactured by thyssenkrupp Rasselstein are considered as articles according to REACH-Regulation 1907/2006. The preparation of safety data sheets is not required for articles, details regarding contained chemical elements are specified in European Standard DIN EN 10202-2022. On the basis of our current state of knowledge our articles do not include any substances to be communicated along the supply chain according to article 33, either classified as substances of very high concern according to article 57 and 59(1) of REACH or included in the candidate list for authorisation according to Annex XIV. We will inform our customers immediately in case any changes occur regarding this issue.

Further substances manufactured by thyssenkrupp Rasselstein are registered at the European Chemical Agency (ECHA). The registration confirmations and numbers are available and will be provided to you on demand.

thyssenkrupp Rasselstein always keeps track of the latest developments regarding evaluation, authorisation and restriction and continuously matches the Application List with the used substances to initiate necessary measures on time, if appropriate.
